Maryland Amusement Token Collectors Association

Maryland Token And Medal Society, Inc.

Millard W. Hajek

Maryland Amusement Token Collectors Association

(M.A.T.C.A. or Md.A.T.C.A.)

The Maryland Amusement Token Collectors Association was established in 1979 by Robert A. Johnson who became the first president and only officer of the Association. Correspondence was addressed to Mr. Johnson, P.O.B. J, Catonsville, Maryland 21228. The latest token issues cataloged have the date 1982 and it is believed that this was the last year the organization was in existence. One of the tokens, MATCA-98, indicates that Mr. Johnson became an ex-officer in that year tending to support the above statement.

The majority of M.A.T.C.A. issues were done in plastic with a few made as wooden nickels. Most of the tokens are 29 mm in diameter with some 41 mm, all two-colored (planchet one color and printing another color) issued in a variety of color combinations. In an attempt to catalog all issues, the wooden nickels are also included in this listing along with the plastic tokens. The tokens commemorate various people, places and events throughout Maryland as well as some amusement locations in other states. The obverse//reverse descriptions are separated by "//".

Bob Ritterband sold plastic tokens as "Armor Medallions" as a middle man for the token maker Plasco of La Crosse WI. He processed hundreds of orders from the late 1970's through the 1990's. Tokens were ordered by Mr. Johnson for M.A.T.C.A. through Mr. Ritterband. This was a very popular series, as the topics are mainly amusement machines, places of amusement and entertainment. Most are pictorial.

The catalog consists of two parts. The first part lists the tokens alphabetically under each town which appears on the token. Towns are also listed in alphabetical order. When a name or event appears on the token, the token is listed by event. Those tokens that do not have a town indicated on them are included under "Maryland" as the town. The Maryland section appears at the end of the town listings. The second part of the catalog lists the tokens in numerical sequence by catalog number and includes an obverse//reverse photo copy of each token. A very brief description of the token is given along with it's color, composition (plastic or wood), color of the printing and size in millimeters (mm). The two parts can be used as a cross reference to location a token in your collection or to find if it has been cataloged. It is requested that a list of any "unlisted" specimens in your collection be forwarded to the cataloger, Millard W. Hajek, c/o MD TAMS, P.O. box 3273, Catonsville, MD 21228-0273 for inclusion in a future supplement.

A special thanks goes to Mr. Johnson who very generously donated a large portion of M.A.T.C.A. tokens to MD TAMS to be used as a fund raiser and to Joe Burford who graciously allowed us to view the tokens in his collection for this cataloging effort.
